

HOW TO BE LEGEN-DAIRY IN CYBER SECURITY

HOW TO AVOID
MALWARE
MALLORY

HOW TO BE SAFE AGAINST MALWARE:

- Keep your operating system and software updated
- Think twice before clicking or downloading anything
- Make sure email attachments are from a trusted source
- Don't trust pop up ads that want you to download something

TYPES OF MALWARE:

Key logger: tracks what is typed into a computer's keyboard and will deliver the information to someone else

Adware: Will cause sketchy looking advertisements to pop up on your computer and will lead to not great places on the internet

Bot: Can control your computer without you knowing it

Ransomware: Will cause a pop up on your computer claiming to hold your files for ransom
