Task 5 – Trick Performance:

**Goal:** Program the robot to perform a unique trick or sequence (e.g., a dance, a simulated 'bark', a spin).

**Rules:**

The dog will be inside of a designated square. The trick or sequence needs to be a minimum of 15 seconds.

**Station Layout:**

There will be a designated square made of tape for the dog to perform its trick or sequence in. The square will be large, 3 x 3 ft.
